

VALUES

Who we are

The Precious Metals Impact Forum is an inclusive, multistakeholder platform gathering participants in the precious metal value chain.

The Precious Metals Impact Forum addresses any issue that may be encountered by its members and works collaboratively to create consensual solutions.

Our Vision

The PMIF is committed to improving the state of the entire precious metals value chain – always with the commitment of inclusivity and respect of all stakeholders.

Our Mission

Create a platform to give an equal voice to all members of the supply chain to build trust and engage in dialogue together.

Address all challenges raised by the members of the Precious Metals Impact Forum and build balanced solutions.

Take responsibility for the impacts generated by our own actions as participants in the precious metals supply chain.

Create shared tools to optimize impact, improve transparency and ensure alignment of practices.

Ensure equitable and respectful treatment of all stakeholder concerns.

Ensure the implementation of responsible practices including those defined in the United Nations Guiding Principles on Business and Human Rights, the United Nations Sustainable Development Goals, the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, and beyond.

Values

We are led by a strong sense of duty when making decisions and a conviction that together, we can make a difference.

We strive for:

Equality – all members are equal independent of size

Transparency – we commit to report with transparency, clarity and honesty to all stakeholders (internal or external) while respecting our communication guidelines and principles that aim to provide a secure and trusted environment of exchange

Harmonization – we acknowledge that in a global trade, making a difference requires harmonization of practices

Inclusiveness – we strive to engage all actors – including civil society, affected communities, standard setters, public sector, private sector, international organizations and others

Collaboration – we believe we are stronger together and that only a collaborative approach can make a substantial difference

Stabilization – we acknowledge that the improvement and stabilization of living conditions of impacted communities requires long-term engagement from the entire value chain.

Objectives

Federate the actors of the precious metals value chain at large

Build a safe, transparent, inclusive, harmonized, trustworthy and efficient precious metals supply chain where users are assured to source in confidence

Create synergies and pool resources to amplify the impact of our actions

Review the implementation of common tools to optimize efficiency while improving impact. This could include, for example:

- Shared due diligence system
- Mutualised audit
- Consolidated solidarity fund
- Common grievance mechanism
- Transparent investigation committee
- Supply chain innovation tools
